

PYTHON ONLINE CODE EVALUATION

RUBRIC

Task 1:

```
# Task 1: Function without parameters
def rectangle_area():
    length = 10
    width = 5
    area = length * width
    print("Area of rectangle:", area)
```

Task 2:

```
# Task 2: Function with parameters
def arithmetic_operations(a, b):
    print("Sum:", a + b)
    print("Difference:", a - b)
    print("Product:", a * b)
    print("Division:", a / b)
```

Task 3:

```
# Task 3: Control statement
def check_number(num):
    if num > 0:
        print("Positive number")
    elif num < 0:
        print("Negative number")
    else:
        print("Zero")
```

Task 4:

```
# Task 4: For loop with arithmetic
def sum_to_n(n):
    total = 0
    for i in range(1, n + 1):
        total = total + i
    print("Sum from 1 to", n, "is:", total)
```

Task 5:

```
# Task 5: While loop
def square_numbers():
    n = int(input("Enter number:"))
    i = 1
    while i <= n:
        print("Square of", i, "is:", i ** 2)
        i = i + 1
```

Calling the above functions:

```
# Function calls
rectangle_area()
arithmetic_operations(8, 4)
check_number(-5)
sum_to_n(5)
square_numbers()
```
