

Assignment Tasks

Qn 1: Function Without Parameters

Create a function that:

- Takes no parameters
- Uses arithmetic operators to calculate the **area of a rectangle**
- Prints the result

Qn 2: Function With Parameters

Create a function that:

- Accepts two numbers as parameters
- Returns their **sum, difference, product, and division**

Qn 3: Control Statement (if...elif...else)

Write a function that:

- Accepts a number (use input function)
- Checks whether the number is:
 - Positive
 - Negative
 - Zero

Qn 4: Loop with Arithmetic

Write a function that:

- Accepts a number n
- Uses a **for loop**
- Calculates the **sum of numbers from 1 to n**

Qn 5: While Loop

Write a function that:

- Accepts a number (Use input() function)
- Uses a **while loop**
- Calculates the **square** of numbers from 1 up to that number
